**Week 1-2 Assignment**  
**Part 2**

**The document outline is shown as follow:**

1. HTML Essential Training
  1. Structuring Pages
  2. *Untitled Section*
  3. Conveying meaning through structure
    1. Sectioning elements
    2. Document Outlines
      1. W3C Warning
    3. WAI-ARIA Roles

In the 'structure.htm' file, the body part is mainly divided into three parts: header, main, and footer. The header includes a structural tag called 'nav' to link to the other pages. The main has diverse elements, such as aside, articles, and sections. The tag 'article' indicates the entire information on the body part, and the tag 'section' is a part of the tag 'article'. Furthermore, the tag 'aside' plays an role in containing information that are not considered as important inside of the tag 'section'. In this program, 'aside' can be found on 'W3C Warning' part.
